Health senior.....**so what?**

Let's hear from the real Jordan Belfort

Here's a good explanation from the [real Jordan Belfort](#) :

“The real answer is, before I’m even going to sell a pen to anybody, I need to know about the person, I want to know what their needs are, what kind of pens do they use, do they use a pen? How often do they use a pen? [...] The first idea is that [...] I want to hear [the salesperson] ask me a question. Most average or newbie salespeople think that they’re supposed to sell you the pen, when a really seasoned salesperson will actually turn it into a qualifying session to find out what you need. That’s the truth of it. It’s like trying to sell someone a house and you don’t know if they’re in the market for a house, what kind of house they want, how many kids – so how can you sell someone a house? That’s the point.”

Sell me a pen

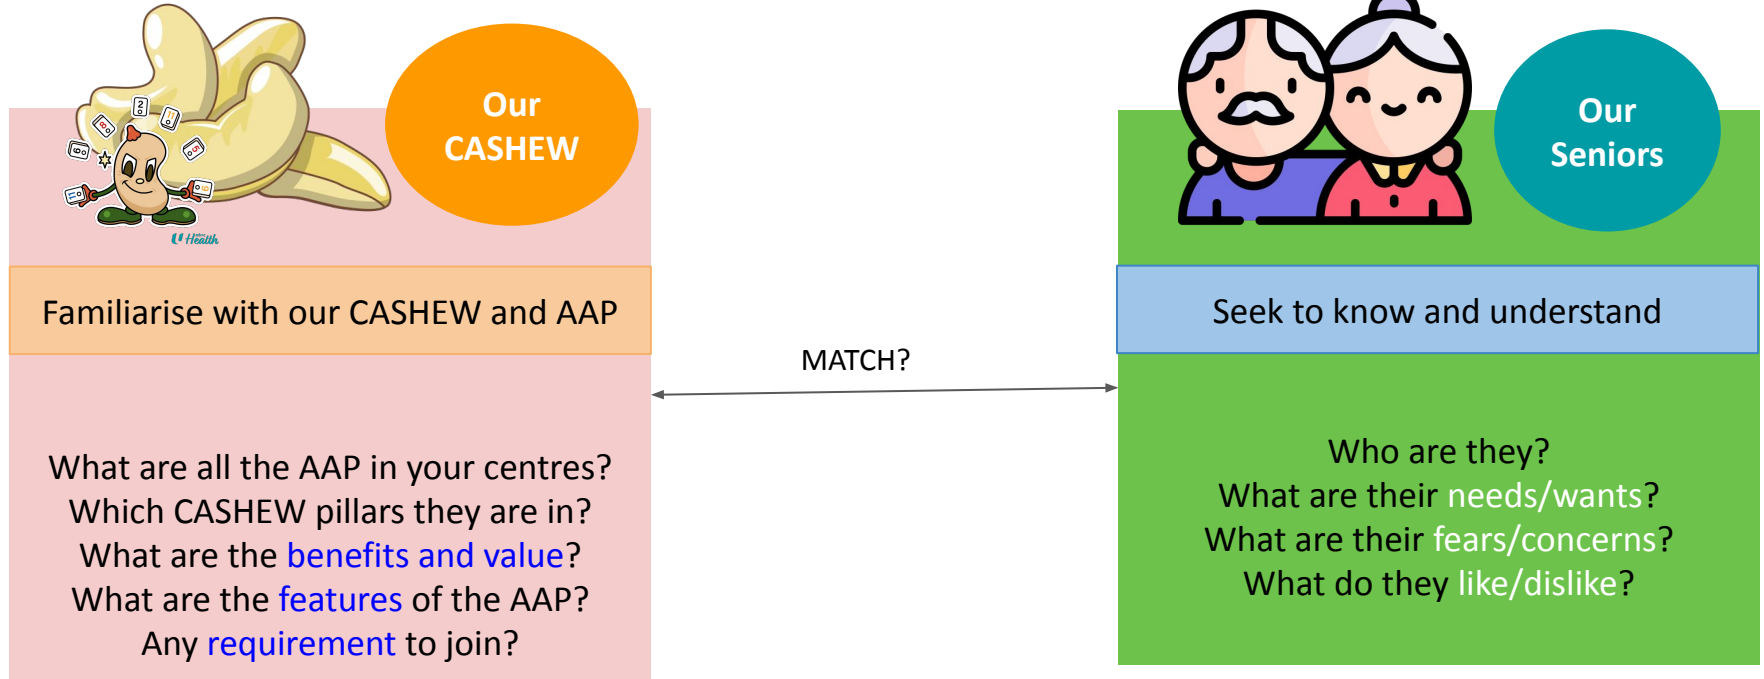

Hacking into minds of his customers can sell something as simple as a basic pen.

Understanding our seniors can promote something as meaningful as our CASHEW AAP

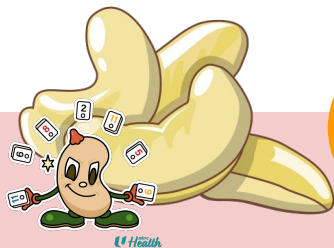

Belfort's discontentment towards everyone's answers shows how he expects individuals to **dig into something more fundamental and intrinsic to human nature** to sell him the pen instead of merely citing him the qualities of the pen.

One **must first understand the buyer's needs**. Once a salesperson figures out their customer's needs, they can fulfill that need by providing a relevant product.

How much do we know about....

Basic Principles - CASHEW

1

Believe in your product

If you don't believe in our AAP, you won't be able to convince others to believe in it either. Your enthusiasm and belief in AAP will come across when you share about them and seniors will be more likely to participate.

2

Focus on benefits, not features

Seniors don't care about the details of your CASHEW . They want to know how it will benefit them. Focus on the benefits of CASHEW/AAP, and how it will improve their lives.

3

Have a clear registration/admin process

A clear registration/admin process helps you stay organized and focused on your objectives. It also helps seniors understand what to expect and what steps are involved to participate.

Several hands are visible, some holding markers. There are also some small white circles and a small photograph of a person's face on the blackboard. The people are wearing various colored shirts: blue, red, green, yellow, and white.

Our
Seniors

Seek to know and understand

Who are they?
What are their needs/wants?
What are their fears/concerns?
What do they like/dislike?

What and How do I ask?

Start with the obvious to build rapport and progress accordingly to more in depth questions. Be genuine and curious. You are helping someone by understanding more.

The Obvious (Basic)

What's your name
Where do you stay?
Who do you stay with
How many people are there in your family

The Unseen (Intermediate)

What are your hobbies and interest?
Can you cook? What's your favorite dish?
How would you describe your family relationship?
What's your proudest achievement so far?

The Underlying (Advance)

What do you think can improve in your life now?
Are there any aspects of your health that you are concern with?
Do you have any regrets?
Which family member do you feel more worried for?
What are you most afraid of in your life?
What do you want to do but havent had the chance to?

Let's understand our seniors

1 Start with **SMALL TALK** and get the senior to talk about themselves

- Ask open ended questions
- Follow the flow of the conversation
- Be genuine and curious in knowing and find areas to improve the senior's life

TIP: Listen. Get senior to share and talk more

2 Ask guiding questions to understand how seniors spend their time, things they enjoy doing

- How seniors spend their time (not necessarily mean they enjoy the time spent)
- Find out things they enjoy doing

TIP: Let's try to find out 10 things about the seniors

ACTIVITY 2

Find a partner (someone whom you don't know or not familiar with).
You have 10 min to make small talk and try to find out 10 things about each other

Examples of guiding questions

- Start with a question
- You may use 5W and 1H (Why, What, When, Where, How)
- Ask follow up questions

Examples:

- How often do you gather with your old classmates or family members?
- When was the last time you went for an excursion?
- How do you feel about your health?
- What are your health goals or health concerns?
- What's your exercise plan?
- Do you like to play games?
- What kind of games do you play in the past?
- Do you like to do things with your hand?
- What would you like to learn more so as to interact with your grandchild?
- What are some of the things you would like to learn (i.e. photography, coding, language)

Key Principles

1

Understand your senior

Ask Questions

You must understand who your seniors are, what they want, and how they make decisions. This knowledge will help you tailor your sharing to their needs and increase the chances of them participating

2

Listen to your seniors

Paraphrase/Mirror/ Allow seniors to talk more than you

Seniors want to be heard. Listen to their concerns, questions, and objections.

3

Build rapport

Acknowledge/Validate/Find Commonalities

People listen from people they like and trust. Build rapport with your senior, and show that you care about their needs. This will help establish trust and increase the likelihood of them coming for your AAP.
